

Figure 2. Difference in reported births at each age in individual years from 15-19 cohort and 20-24 year cohort for two consecutive DHS: Uganda 2006 and 2011 and Senegal 2005 and 2010/11.

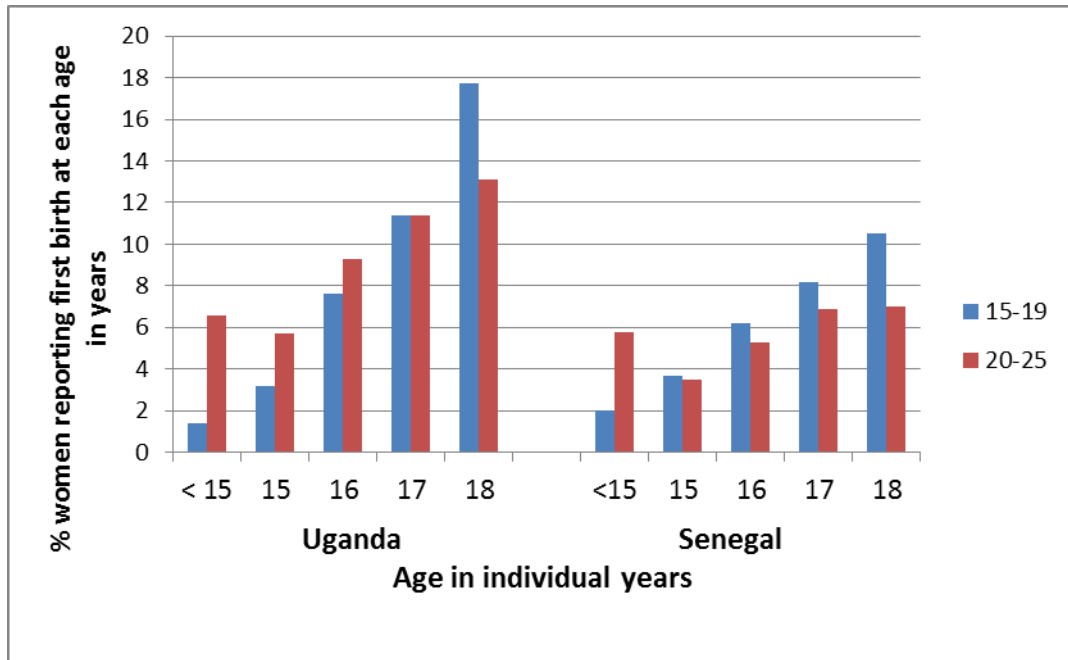

Fig 3: Trends in % women reporting first birth <16 years by age cohort from first DHS survey: Sub Saharan African Countries.

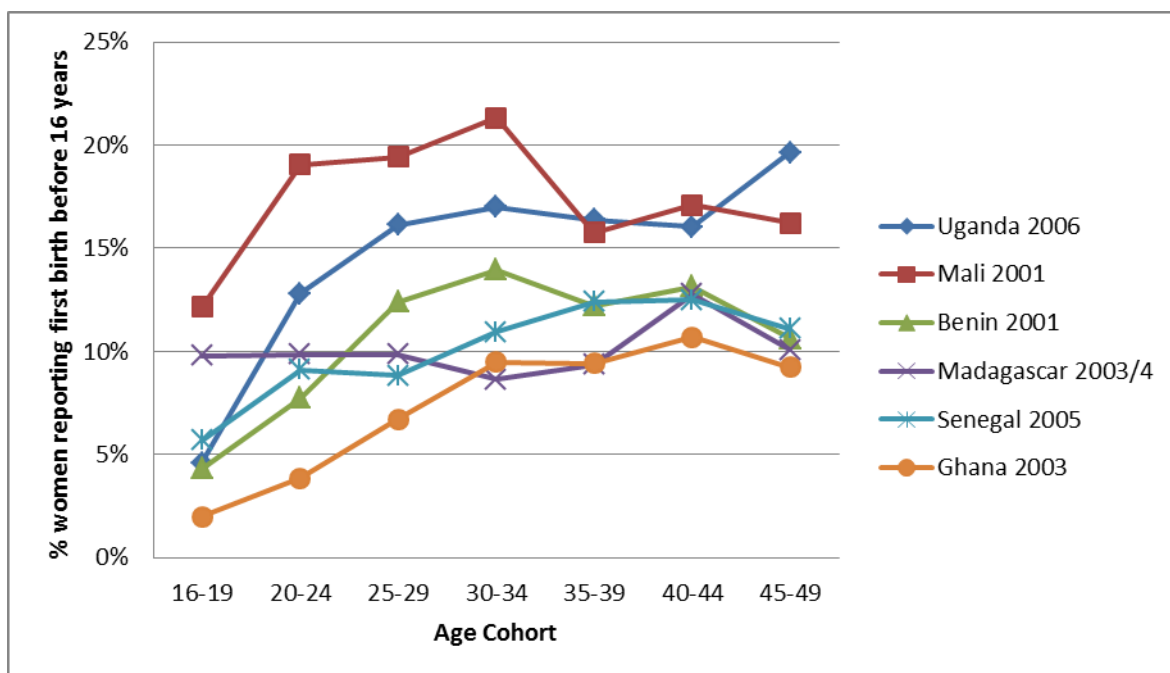

Fig 4: Trends in % women reporting first birth before aged 16 years by birth cohort for three consecutive DHS: Uganda

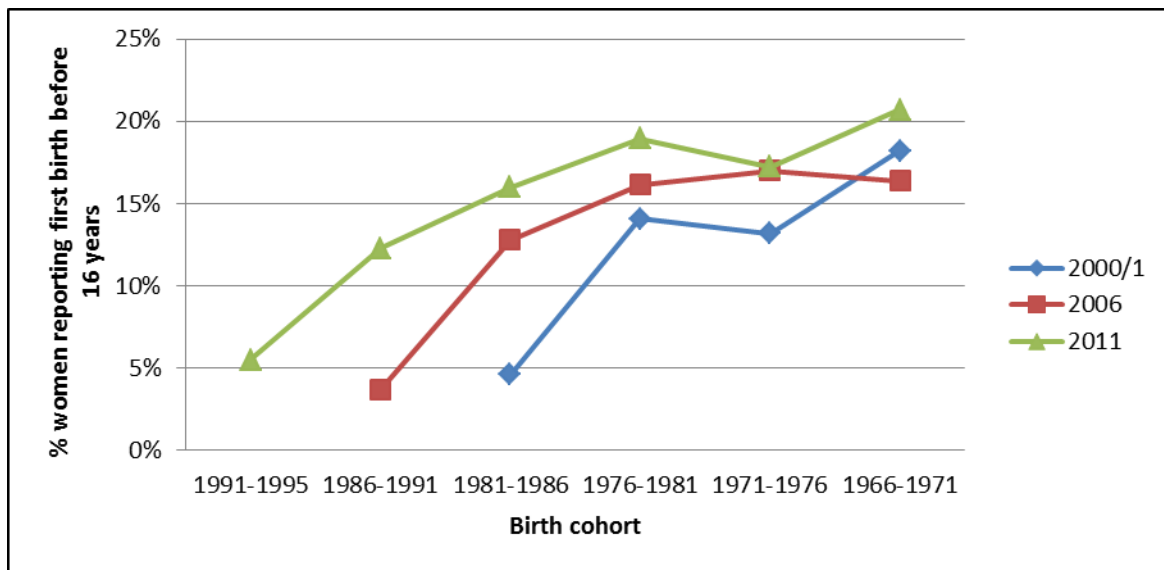

Fig 5. Trends in % women reporting first birth before aged 16 years by birth cohort for three consecutive DHS: Mali

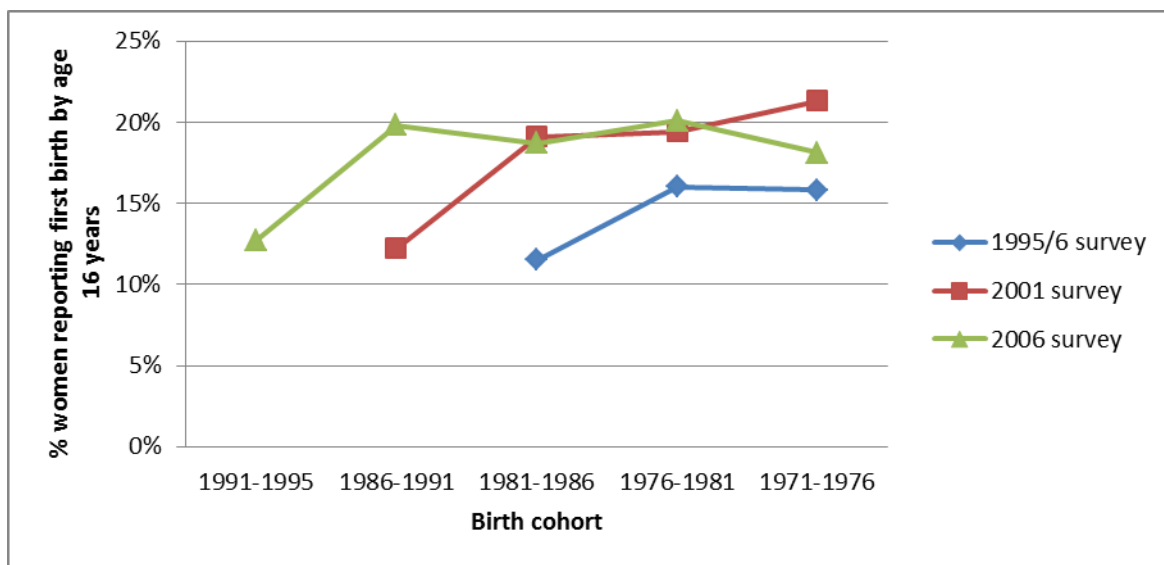

Table 1: Proportion of women who reported 1st birth by age 15, 16, and 19 years in the 15-19* year age group in the 1st DHS survey (column 2) and the 20-25 year age group in the subsequent survey 5 years later (column 3). Confidence intervals in parenthesis. Shown with the % difference between the two estimates and actual difference.

First birth				
Country	15-19* cohort	20-24 cohort	% difference between cohorts	Actual % difference
Uganda	2006	2011		
<15	1.4 (0.9-1.9)	6.6 (5.4-7.8)	371	5.1
<16	4.6 (3.5-5.7)	12.3 (10.7-13.9)	167	7.7
<19	45.5 (44.4-46.5)	46.1 (43.7-48.6)	12	4.8
